SUMMARY

Frontend engineer building production web applications in React, Next.js and TypeScript. Experienced in enterprise dashboards, payment and wallet flows, role-based access systems, and turning designs into responsive, maintainable interfaces at scale.

EXPERIENCE

ShipPack (logistics platform) - Frontend Engineer

Remote · Jun 2025 – Present

- Built **four role-based dashboards** and the public marketing site for a multi-tenant logistics platform **270+ routes** and **500+ reusable components** in **Next.js** and **TypeScript**.
- **Business console**: single and bulk shipment creation, live tracking, returns, warehouse rental booking, and a B2B supplier hub with quotes and checkout.
- **Fleet console**: driver onboarding and licence verification, vehicle management, delivery bid flows, and **live dispatch tracking via Google Maps API**.
- **Supplier portal and admin console**: catalog management with bulk CSV import, stock and order fulfilment, account verification across six user types, pricing configuration, and withdrawal approvals.
- Implemented the **wallet** across all four consoles funding, withdrawals, transaction history, **payment integration**, and client-side PDF receipt and invoice generation.
- Built the team-management and **role-based access control** system with custom roles and granular permissions.

Remita Payment Services - Frontend Engineer Intern

Lagos · Apr 2025 – Oct 2025

- Ran QA on the Admin / Action Mapping system at one of Nigeria's largest payment providers, resolving **40+ logic conflicts** during UAT and **cutting reported bugs by 95%**.
- Helped build the **Sync Profile service**, a background job keeping user data consistent across distributed servers.

Freelance — Frontend Developer

Remote · Jan 2023 – Apr

2025

- Delivered projects for **20+ clients** across **e-commerce, ed-tech and fintech**, taking each from requirements to a live, responsive product.
- Built an **asset management portal**, a **payment portal**, a university dashboard, e-commerce storefronts and ed-tech learning platforms.

SELECTED PROJECTS

ShipPack Website — Next.js, Tailwind CSS, Framer Motion, Google Map

Public marketing site for a logistics platform. Built the interactive shipping rate calculator, package tracking portal, service and pricing pages, and animated landing pages with interactive fleet maps.

Campus Chow — React, JavaScript, Tailwind CSS

Food ordering and delivery platform for students and campus communities. Built vendor discovery, menu browsing, cart and checkout, and order tracking.

Link: [CampusChow](#)

NutriPadi — React Native (Expo), TypeScript, FastAPI, Python

Cross-platform mobile app that identifies African dishes from a photo and returns a nutrition breakdown, with maternal-health guidance in multiple languages. Built the app end to end plus the FastAPI backend serving the model.
